[Raw Data](#)

(200000 - 500000 estimated owners) - (VR,Action,Multiplayer,FPS,Indie,Co-op,Strategy,Cyberpunk,Singleplayer,Shooter,Early Access,Arcade,Robots,Online Co-Op,PvP,Sci-fi,Co-op Campaign,Horror,Futuristic,Atmospheric)

Neo-Shinjuku - 2271. The massive and seemingly benevolent Eden Corporation owns the world. The elite hacker resistance movement SyndiK8 has unearthed the sinister reality behind Eden Corp's newest line of robotic products. As one of SyndiK8's elite operatives, your mission is straightforward: infiltrate Eden Tower, steal as much Raw Data as possible, and get out alive--bringing Eden Corp down in your wake. However, as the secrets behind Chairman Shiro's new "Promotion" program becomes clear, the reality gets much more complicated. Does it really grant immortality? What is Eden truly collecting? It seems that Eden's corporate veneer may be just a thin facade for something much, much worse. Built from the ground up for virtual reality, Raw Data's action combat gameplay, intuitive controls, challenging enemies, and sci-fi atmosphere will completely immerse you within the surreal environments of Eden Corp. Go solo—or team up with a friend—and become the adrenaline-charged heroes of your own futuristic technothriller. You will put your wits, boldness, and endurance to the test. Active VR gameplay turns you into a controller, with instant reflex access to an arsenal of advanced weapons and cutting-edge nanotech

powers. Shared spaces with avatars and motion tracking encourage players to physically communicate through body language and environment interaction. Cool Features Active VR Combat: Utilize your body to dual wield pistols, slash and slice katanas, pump shotguns, deflect projectiles, do gun tricks, or even use your fists in close-quarters combat. Holster up and pull weapons off your body with physical loadout and check your stats on the in-game forearm display. Hostile Takeover PvP : Whatever side you're on, this fight is personal. Featuring four hero classes with optimized abilities, balanced gameplay, intuitive "joystick" locomotion, as well as stealth and armor powerups, Raw Data: Hostile Takeover lets you battle it out in up to 5v5 matches across multiple king-of-the-hill maps. Duel Mode (coming soon!) also provides a unique 1v1 showdown experience for those who are bent on revenge. Choose Your Hero: What's your fighting style? Choose from multiple badass heroes--Bishop, the Gun Cleric; Saija, the Cyber Ninja; Boss, the Street Merc; or Elder, the Rogue Hunter --with a variety of advanced weaponry, special abilities, combat techniques, and ultimates. Defy gravity, slow down time, charge up shots, crush enemies, boomerang your blades, unleash deadly bullet barrages, fling enemies into the air, and much more. Deadly Weapons and Defenses: Access a futuristic arsenal of firepower, from dual handguns and pump-action shotguns to iron knuckles and laser swords, as well as deployable turrets and holographic shields for extra insurance. Adaptable Enemies: Battle against swaths of murderous machines, including stealth ninjas, laser gunners, rocket heavies, jumping crawlers, exploder bots, flying drones, charger mechs, ion beams, towering megabots, and more. Cross-Platform Online Co-op: Bring along a trusted partner to cover your back no matter what platform they're playing on. Team up in a shared co-op VR space that encourages social communication via body language, facial expression, and blended animation.

[AvatarShop](#)

(0 - 20000 estimated owners) - ()

'AvatarShop' is the application that automatically generates kawaii girl avatars at the click of a button and allows you to make simple arrangement of the avatars! The avatar you create can be exported in VRM format. The exported avatars can be used in VRM compatible metaverse. Join the Metaverse with 'AvatarShop'! One click avatar generator The avatars that appear in the game include school uniforms, swimsuits, jeans, witches, zombies, and a variety of other avatars! There are also different patterns with unique hairstyles, hats, bags, and other items! In addition, there is a simple editor that can arrange body shape, hair color, eye color, shape, and more! Export VRM The avatar you create can be exported in VRM format. The exported avatars can be used in VRM compatible metaverse. Upload your avatar to 'cluster' or 'Virtual Cast' without any conversion. You can also use it in VRM-compatible games and applications. And you can modify the output avatar as you like. For example, you can convert it to FBX and go to VRChat! Join the Metaverse with 'AvatarShop'! Japanese & English supported You can change language English and Japanese in this app. Enjoy! Need more option? ♦Add some cute items! 【ItemShop】 / ♦Change other dress with DressMaker series! *Important* * Underwear avatars only supported by Dressmaker

series. * Avatars in other outfits are not supported. i.e. swimwear, school uniform, short pants etc.

[connect - Virtual Home \(3D or VR\)](#)

(0 - 20000 estimated owners) - (Utilities,VR,Free to Play,Design & Illustration,Exploration,Software,Massively Multiplayer,Platformer,Hidden Object,Atmospheric,RPG,Indie,Simulation,Experience)

connect is your immersive VR home in an exciting virtual world! You can carry it around in your pocket (phone), or experience it all around you in Virtual Reality (VR). Your customizable virtual home offers VR games, different VR experiences, virtual pets, social VR, video calls, VR 360 and worldwide multimedia. With the “multimessenger” you can also reach all your friends via connect. Your secure VR home can be used in 2D, 3D or VR and offers all the facilities of a real home – only even better, because you can decorate this virtual home to your own personal taste for free! Multimedia (Internet, Video, Audio, Print & VR) Thanks to our free media interface, content of various big newspapers and magazines will be available to you free of charge, likewise films, TV and radio programs, streaming, YouTube, web portals & VR media (e.g. 360 VR videos). For example, you can watch YouTube videos in 360° or set them as a outlook from the virtual window. ”Multimessenger” & VR Social Network & Social VR In the virtual organizer on your virtual desk, you can unite all your contacts from your phone book, mails and online networks (like Facebook) and reach them within connect. You can, therefore, reach more people from connect than from Facebook, even though they might not be using connect yet – because Facebook only gets one part of your new social home. connect also has its own secure messenger with video calls and sending 3D objects or stickers via chat. Customizable VR World Your VR home in this virtual world is customizable to the smallest detail. Customizability begins with the VR room, the furniture and accessories, and continues to the choice of view from your window (own VR 360 photos too), or your own handwriting. You can even decorate your virtual home with own or foreign art and photos. We will also offer different VR scenes or VR rooms – e.g. the Oval Office. VR Games & Virtual Pet Are you bored while chatting? Go and pet your virtual pet, or play some VR games (e.g. “Connect Four”) with friends. There are many different VR pets like a virtual duckling or a virtual crocodile baby. You may teach them special tricks and their behavior depends entirely on how you treat them. Interfaces For Users & Partners Are you fed up with having to install a new app for each separate function? Or that your favorite software is not compatible with every hardware? Have you ever been annoyed that your different circles of friends are available on various different networks? To get rid of these unnecessary irritants it is our goal, with combined strength, to build a network which unifies all the different digital contents and features, and where the utilization and operation is as easy as possible. For this purpose we have created a platform, where our Partners – and you too! – can upload content. Our partners will be uploading, among other things, 3D models of new objects or furniture, media content such as newspapers, magazines, books, TV or radio programs, or link connect with existing messenger services. You can upload art work, photos as decoration, animated GIFs or videos, sounds, or 360° photos

for an alternative view from the loft, and determine who has access to it. Anonymous, Data Protected & End-to-End-Encrypted Our number one aim for this new VR world is maximum data protection, anonymity and keeping the user's personal privacy. Our own secure messenger is end-to-end encrypted. We promise that connect will stay free of charge without forced advertising, and guarantee maximum data security at the same time. As we are therefore unable to sell personal information (and do not want to, either) we started looking for alternative sources of income: We will finance our business through voluntary product placement, in-app-purchases, and virtual shopping. connect – your Social Home – offers:

- secure, customizable, interactive, immersive VR home
- device-independent & live switch for 2D, 3D or VR
- multimedia (all media worldwide, VR media & VR 360)
- “multimessenger” (reach all friends in only one app)
- send 3D objects via chat, make video calls and enjoy realistic VR scenes
- social VR (many social VR functions, soon avatars too)
- VR games, VR pets, virtual world, VR network, VR media -----

Android version and alternative download possibilities There is also an Android version in Google Play Store (search for 'connect vr home'). If you don't have Steam or Google Play Store, you can download the PC or Android version from our homepage too (link on the right side), but we recommend to use the Steam or Play Store version, because they get updated automatically. Also works without VR! You can also use connect without VR headset! It works like every 'normal' 3D game too. At the moment we support the VR solutions of HTC Vive or Oculus VR. Goal: 'Oasis' from the book/film 'Ready Player One' In the long term connect should become your own customizable, expandable, free of charge, data protected and secure virtual world - a bit like the 'Oasis' in 'Ready Player One' (book, film). We are giving our best to build this new world as user friendly as possible, so that you alone have the control over your 'lucid dream' with a maximum of privacy and security and without costs, forced advertising or purposely built-in methods to make you addicted to this new kind of entertainment.

[Helios](#)

(0 - 20000 estimated owners) - (Early Access,Adventure,Casual,Massively Multiplayer,VR,Co-op,Sandbox,Action-Adventure,Choose Your Own Adventure,Exploration,First-Person,Realistic,Third Person,Atmospheric,Building,Comedy,Open World,Game Development,PvP,Character Customization)

Helios is at its core, a creator friendly Social Desktop + VR game made in Unreal Engine 4 Helios offers a more immersive, interactive, and creator friendly experience than anything currently available. You can create and explore community created virtual worlds with friends or you can join others in public or private servers, create and share avatars all through the Steam Workshop. Helios harnesses the vast capabilities of the Unreal Engine, empowering creators in new ways along with unparalleled visual fidelity. As the community grows, more activities that we haven't even considered will begin to emerge organically. Our mission is to make it as simple as possible for users to add their unique content via Unreal Engine.

[BUTTS: The VR Experience](#)

(9 - 20000 estimated owners) - (Psychological Horror,Casual,VR,Nudity,Memes,Funny,Free to Play,Sexual Content,Illuminati,Horror,Gore)

THIS IS A VR ONLY APP, FRIENDS 'BUTTS: The VR Experience' is an animated VR short about love, trust, and learning what it means to be truly free. With the latest VR technology one can transport oneself into a brand new bright and colorful world of happiness and excitement, and make some friends along the way. 'BUTTS: The VR Experience' will make you laugh, cry, fill you with unimaginable bliss, and return you to that innocent place of child like wonder you've long forgotten. Official Selection - Cannes NEXT - 2016 Official Selection - Kaleidoscope World Tour - 2016 Official Selection - Kaleidoscope North American Tour - 2015 Nominated 'Most Innovative' - Proto Awards - 2014 RECOMMENDED VIEWING: Sit on the floor in the center of your play space. No controllers necessary. Making and supporting animation and VR is very time consuming for one individual. Please help support the artist by contributing \$0.99. It's only a dollar, you guys. You know, like when you spend more than that on a coke, and then you don't drink the whole coke... do you complain about how much that coke costs? Is that an upsetting amount of money you spent on that coke?

[LIV](#)

(100000 - 200000 estimated owners) - (Video Production,Utilities,Web Publishing,VR)

LIV is the #1 VR toolset that empowers YouTubers, streamers, VTubers, and other content creators to capture professional-quality VR content. LIV is known for mixed reality capture which lets you film yourself inside games, but it has a wide selection of features that will take your VR content to the next level. Key Features Supports most VR headsets : Works with most VR headsets, including wireless Quest 2 support Hundreds of games supported : Works with many popular VR games, including Beat Saber Easy-to-use background removal : No green screen required, works with any webcam Improved first-person capture : Smoothing and field-of-view settings improves your first-person content Mixed reality capture : Film your real body inside your favorite VR game Avatar capture : Transform yourself into your favorite avatar or build your own avatar on our website See Twitch chat and alerts in headset : No need to leave VR to interact with your viewers Extreme camera control and mods : Create stunning spectator content with custom camera controls Testimonials 'LIV has actually changed my life. I've blown up on TikTok, YouTube, and Twitch in what feels like virtually overnight. The fact that people can see me goof around inside games is magical-- people are really engaged with my content. I can't thank LIV enough.' - LSToast 'Wanna make your videos in VR not look like trash? Sick of headset views making viewers sick? Welp, here's your tool. Mixed reality with very little setup. [Hentai VR 4](#)

(0 - 20000 estimated owners) - ()

In this game, you can enjoy an erotic experience that is so realistic and immersive you will forget it is virtual. With VR, you can experience pleasures beyond what is possible in the real world. There has never been anything quite like this — it's the ultimate entertainment experience! How to play: You can move freely in the VR space, jump to platforms, grab lights and dance. You can also fool around with beautiful naked women and enjoy naughty play. Persons involved in sexual content are over the age of 18.

[Live2D VR Girls](#)

(50000 - 100000 estimated owners) - (Animation & Modeling,VR,Anime,Sexual Content,Nudity)

With Live2D VR Girls, you can experience VR experience with lively animated characters by Live2D. It is a game aimed at telling the charm of character expression with two scenarios and easy operation. About Live2D Euclid Live2D is a technology that can move three-dimensionally while taking advantage of the charm of the original picture. Euclid, one of the new evolutionary forms, realizes expressions as if characters drawn by combining with 3D exist there. Scenario introduction A.Live2D Nursery Division You are a classmate of the same brass band as Yui. After classes, you meet Yui on the way to club activities. And to Yui who appeared in front of you ... voice actress: Tomoyo Kurosawa B. Fuka's room After sleeping together in the room of Fuka, you fell asleep shortly. When you awoke, Fuka immediately next to you ... voice actress: Ayana Taketatsu

[VR Parallel World](#)

(0 - 20000 estimated owners) - (Casual,Exploration,VR,First-Person,Open World,Sexual Content,Singleplayer,Nudity)

Are you living your best life? Have you ever thought about a next life? Join this game, where you can recreate your life in another world, with your beloved girl, in any space-time of your choice. You may wait till kingdom come ... or try this game. This is not a VR Minecraft, although you can create too, but everything and every person in this game were so real and even beautiful. You will create a new life/world for yourself, in any space-time you love. This is not a VR Porn, although you can DIY bodies too, sexy ladies, lovely girls, you can even become one of them, but the faces you generate were so real and they can interact with you. This is not a VR Travelling, although you can fly & tour hundreds of worlds, but the magic power you own, makes you different. You will master aging or youth, cold winter or golden autumn, beauty or wither, ice-bound or melting. So we call this game another world. Hereafter. In the game, players can click on any world card to start a new world. For example, you can choose to live in Jurassic Age, Pre-History, Early History, Medieval Age, Victorian, 19th Century, 1920s, 1940s, 1980s, Modern, or even Future World. Players can then place various characters or infrastructures in their selected scenes. They can control the size and direction when placing the additional objects or completely recreate them. They can also choose to upload their creations for

other players to download and use. Subsystems/functions include: (1) Choose a body for yourself. Or you can play without a VR body too. You will see yourself. And you can open a mirror from the main panel. (2) Fly freely & Fly over thousands of worlds. (3) Build this world. Construction mode: Experience a building system exclusively optimized for roomscale VR in a way that was never seen before. You can even move blocks after you have placed them. (4) Magic. You will master aging or youth, cold winter or golden autumn, beauty or wither, ice-bound or melting. (5) Hundreds of characters: You can decorate your world with 800+ different live characters. (6) Players can tailor-make their avatar's body features and upload a photo from their computer to generate a face of their choice: This game is unique among all simulation games as it allows players to create faces through photos with one click. The AI technology used in this game ensures the complete copy of the photo uploaded by players. Note: The uploaded photo will be immediately reflected on players' avatar, as shown in the above/below examples. All the head designs customized by the player will be stored in a VR 3D menu. Players can drag any head from this menu to their girl avatar for easy access. (7) DIY your virtual friends/lovers: Body shape, Clothes, Design Actions/Animations Players can set their avatar's body features at will. The 3D menu offers diverse options for bust, waist, and hip measurements. They can also choose their avatar's skin tone, leg to butt ratio, and hairstyle as finishing touches. Players can choose their avatar's movements. The game offers a library of more than 200 daily actions and 60 sets of dance actions for players to set combinations. Players can pick the clothes for their avatar. Players can unleash their creativity through the comprehensive and powerful control panel below. (8) Control Your Body Size. Want to explore panties as a fly? Players can choose to be a mini butterfly, or maybe a giant. (9) Raise your VR pet in this new world. You can also ride on them. You can even create a zoo, as well as prehistoric creatures, including various dinosaurs. (10) More than 100+ tools. Here, you can create your dreams. See you in the new world!

[Bullet VR](#)

(0 - 20000 estimated owners) - (Action,Adventure,Indie,Casual,VR)

The year 2020. You are a real war hero, who has gone through a lot and seen a lot of bad things, but you has not seen anything like that. A huge threat has come to your favorite planet - the Earth. Huge crowds of aliens are attacking your house, destroying cities and only you can stop them, only you can save the planet! Your task is to hold out until the end, to destroy enemies, alien technology and their master. The fate of the whole civilization is in your hands! Try a new experience in VR, try yourself and look at your friends, how they will save the world together with you (if, of course, you invite them to visit)! Three game modes: ▪ Classic mode. ▪ Endless mode. ▪ Fight mode. Features: ▪ Achievements ▪ Unique boss. ▪ Unique experience. ▪ Absolute power. ▪ Epic invasion. ▪ Several types of weapons. ▪ Fight, survive, save the world!

[VR Jetpack Game](#)

(20000 - 50000 estimated owners) - (VR,Flight,Multiplayer,Shooter,Simulation,Space Sim,FPS,Battle

Royale,Action,Adventure,Indie,Massively Multiplayer,Early Access,Fantasy,Twin Stick
> Shooter,Futuristic,Robots,Sci-fi,Space,Surreal,VR Only)

Physics-based VR with full freedom of flight. VR that feels and controls like a real jetpack. A real-time multiplayer VR arena. Players can fly and interact with each other online in VR with realistic physics-based controls. The controls are completely VR and natural, just as you would use thruster controllers for a real jetpack (look up Jetman as an example). It's truly free range of motion and natural movement, not the teleport or D-pad controls of most VR games. This includes but is not limited to being able to hover, drift, spin, flip, and burst through the sky without ever hitting any special buttons (all controller angle/position based). It's up to your own imagination what combination of moves or positions you might be able to do in the air. You can even now swing and do hookshots with the new grappling cables. Note that this means you can and will go upside-down. Like with roller coasters, skydiving, or any other real-life thrill or extreme sport, this experience is not for everyone, but for the right people, this comes very close to feeling like flying (and swinging) in real-life. The game is currently being released as Early Access, as the core mechanics and flying functionality along with multiplayer have been done for over a year now. The slowest part of development, and what is taking the most time for me as a 1-man team, is the more traditional parts of the game, such as map building, graphics, and other assets. If anyone is interested in helping work on these items, feel free to reach out on the VR Jetpack Game website. Longer term, once the more traditional parts of the game are done, the game will take a more open-world / sandbox direction as a testbed to integrate other projects of interest, such as introducing some of my plans for the AI project at Conatus.ai (and we can see if people realize when the other players aren't human).

[People Cu3ed](#)

(0 - 20000 estimated owners) - (Action,Adventure,Indie,Casual,VR,Puzzle,Puzzle-Platformer,VR Only)

If you like VR, love Humour and want an experience where you are very much not a normal 'virtual' person you need to try People Cu3ed! It's a VR experience like no other! You'll find yourself transformed out of your normal human body, and embodying the leader of the 3rd dimensions entry into the '21,999th Inter-Dimensional Games'. Not heard of these? Well it has been a while since the 3rd dimension hosted them... You'll find yourself using your brain, your reactions, and your friends to navigate through the 40 levels of the games - hopefully, to win back your full human form - if, you can earn it. So join Sara, Becky, 'The Twins', Henry, Agnes and their daughter 'Baby Suzie' to represent your whole dimension - and conquer 'the games'! So let the games... Begin... FEATURES: - Social Strategic View: A rare social experience in VR. - Innovative VR Embodiment Experience: Not just another virtual version of real life... - Action-Adventure-Puzzles: A great balance between making your heart pound and your head ache!

[VR historical journey to the age of Crusaders: Medieval Jerusalem, Saracen Cities, Arabic Culture, East Land](#)

(0 - 20000 estimated owners) - (Action,Adventure,Indie,Casual,VR,Puzzle,Puzzle-Platformer,VR Only)

(0 - 20000 estimated owners) - (Casual,walking simulator,VR,Medieval,Singleplayer)

The Arab Empire (632-1258) was an Islamic empire established by Arabs in the Middle Ages. Chinese history books since the Tang Dynasty have been called 'big food (yì)', while Western Europe is used to call it the Saracen Empire. The Arab Empire has gone through 626 years. There are four major caliphs (632-661) and the Umayyad dynasty (661-750) and the Abbasid dynasty (750-1258). We have seen many books about the Arab Empire, but have you tried a realistic Arab Empire world? In real life, we cannot go back to the past, and we cannot empathize well with the culture of that era. But in the VR field, we can enable you to enter an extremely real world by using virtual reality equipment. The historical journey in the era of the VR Crusader is to simulate the virtual world of the Arab Empire. You can feel the desolate and dry desert environment of abandoned small villages, experience the suffering of the people's life in the Arab Empire, and see the splendid castles of the Arab Empire. You can walk freely in the game, you can appear in any corner of the palace, you can also stand on the castle and look at it, it will grow alive in front of you. The immersive and immersive feeling brought by VR technology is unmatched by other technologies. We have built several simulated scenes for this game. You can choose any scene to start your tour. At the same time, in order to prevent you from being bored during the tour, we have also designed a game session to find the treasure chest to bring more fun to your tour. Every time you find a treasure chest, you will get different points. The more treasure chests you find, the more points you will accumulate; don't underestimate this point, this point will bring you a huge surprise after the game is over Big gift package. In addition to the game items to visit the scene, we also provide fishing game items imitating traditional fishing, bow and arrow hunting games and snake games. I have to say that the snake-eating game is very good for our shoulder and neck health. At the same time as the game, we are constantly exercising our cervical spine. It is really a very good game. Arabia's hectic territory stretches from the Indus River and Congling in the east, to the Atlantic coast in the west, to the Caucasus Mountains, Caspian Sea and southern France in the north, to the Arabian Sea and the Sahara Desert in the south, with a land area of 13.4 million square kilometers. It is the east and west in ancient world history. One of the empires with the longest span is also a great empire that straddles Asia, Europe and Africa after the Persian Achaemenid Empire, the Alexander Empire, the Roman Empire, and the Byzantine Empire. From the second half of the 9th century, the Abbasid dynasty entered a period of division and gradual decline. The feudal lords or governors of various regions held separate forces, monopolized one side, separated from the center and became independent, and the Caliphs became the puppets of the Bouvets and the Seljuks. In 1258, the capital of Abbasid Baghdad was captured by Hulagu, the last Baghdad caliph Mustaisuimu was killed, the Arab Empire was destroyed, his uncle fled to Cairo, was adopted as Mustansir II, until 1517 Ottoman The empire was destroyed by the Mamluk dynasty. The last Cairo Caliph Mutawakil III under the control of the Mamluk Sultan was captured, and his caliph title was also captured by Selim I. Due to its unique geographical location, the rise of the Arab Empire changed the development process of many neighboring nations and had a very important influence in the history of the Middle Ages. The huge Arab empire is a multi-ethnic, multi-religious, and multi-belief collection established by Arab nobles

through force of conquest. There are certain estrangements and contradictions between different nationalities and different beliefs; there are irreconcilable class contradictions between the broad masses of the people, the aristocratic bureaucrats, and the wealthy business class; the Muslims are also torn apart due to complex contradictions; especially the further feudal system Develop and cultivate divorced forces from within the empire. Therefore, in the middle of the 9th century, the Caliphate had gradually released its own energy, and the empire had fallen sharply to the end of its disintegration, until its end. As early as the establishment of the Abbasid dynasty, the descendants of the Umayyad family separatized the Iberian Peninsula in Europe and established the later Umayyad dynasty (756-1236). Because of the color and whiteness, Chinese history books called it 'Big food in white', and the Abbasid dynasty fight against courtesy. In 788, the Shiite Idris dynasty emerged in North Africa and Morocco. The differences in the economic foundations of the empire and the strong local power created by military confinement contributed to the formation of a separatist regime. The powerful economic foundation and military power that the governors and military commanders of various regions gradually acquired as a result of the implementation of the landlord system constituted a serious threat to the rule of the Abbasid dynasty. Dozens of governors and military commanders from all over the east and west took the opportunity to stand on their own feet, attacking and conquering each other, and trying to encroach on the central government. In 800, general Ibn Agreb established the Agreb dynasty (822-875) after he obtained Tunisia. In 868, the Governor of Egypt, Ahmed Tulun, declared independence and established the Tulun Dynasty (868-905). After the Tahir Dynasty in the eastern provinces, the Safar Dynasty (867-903) and the Saman Dynasty (874-999) appeared one after another. In 909, Shiite Muslims established the Fatimid dynasty in Tunisia, and successively conquered Algeria, Syria, Egypt, and Sardinia. In 973, they moved their capital to Cairo. Because of the green color, Chinese history books called it 'green food'. In addition, Mosul and Aleppo established the Hamdan dynasty; Persians and Turks established the Saman, Baiyi, Ghaznavid, and Seljuk empires in Persia, Central Asia, and Asia Minor; The Ayub Dynasty was also established in Egypt, Syria and Yemen. During this period, kingdoms large and small came and went. After the 10th century, the empire was torn apart and the actual ruling area was limited to Baghdad and its surrounding areas, which existed in name only. Ali, the third son of Baiyi from the Delemu people on the south bank of the Caspian Sea, occupied Shiraz, the capital of Fars in 934; his brother Ahmed entered Baghdad in 945, and Caliph Mustekfei became the puppet of the Baiyi family. The feudal lords in various places maintained a separate regime and dominated one side. In 1055, another Seljuk captured Baghdad and removed the caliphate from political power, retaining only the status of religious leader.

[Operation Armstrong](#)

(0 - 20000 estimated owners) - (VR,Local Co-Op,Asymmetric VR,Co-op,Stealth,Indie,Action,Strategy,PvP,Multiplayer,Local Multiplayer,Controller,Top-Down,Online Co-Op,Party Game,Level Editor,Party,VR Only)

Your infiltration team has been tasked with completing a series of missions to stop an army of lunar-bots from crashing the moon into our Earth! The field operative will wield the VR headset, sneaking through each lunar-outpost avoiding the mechanical guards. In this, they will be assisted by their team of hackers, who will guide the field operative and use their smartphones to help clear obstacles and disrupt the enemy. So gather a group of friends, strap on your VR headset and commence 'Operation Armstrong'! This Asymmetric-VR-Stealth-Party game features the following: A series of hand crafted interactable VR environments Phone browser connectivity for cross platform local co-op with no player limit Dynamic, drop-in/drop-out co-op gameplay Level scoreboards and completion awards A level editor and online level sharing through the Steam Workshop We made the game with the intention of providing a fun way for those spectating a VR user to join in on the action instead of just waiting for their turn. Phone users simply log in to a current game through their browser and can immediately start assisting their headset wielding buddy. Teamwork and communication will be key which can lead to some hilarious and tense moments. Players can drop in and out of the game at any time since responsibilities are dynamically shared equally across all phone users. It's an all round, high energy, inclusive group activity.

[Real Girl VR](#)

(0 - 20000 estimated owners) - ()

Welcome to Real Girl VR! Are you ready for the best VR experience of your life? Real Girl VR is a sex simulator. Realistic and beautiful, we are bringing the best experience in VR you will have so far! There are 26 different girls. 20 girls are FREE! And 6 you can get with a DLC. Some awesome locations to experience virtual sex with them. You can use your Mouse or your VR Headset/controllers for interaction. You can interact with the woman in many ways! Choosing dozens of clothes in the wardrobe, more than 40 sex position, all animated! And many locations to see her in action! All girls are different from each other with

personality, body shape, and ethnicity. MAIN FEATURES - 26 fully and detailed naked girls, genitals, and scenarios. - 4 scenarios. - + 30 sex animations and a POV camera for all of them. - + 5 sexy dancing animations. - sexual face expressions. - animated sex positions. - sexy and sensual clothes and voices. - The sum of Girls + Animations + Locations gives more than 2500 scenes for you. - use your Mouse or VR Headset - VR Headset is not mandatory. And for all interactions, you only need one hand. They are ALL ABOVE 18 YEARS OLD. Oculus Rift, HTC Vive, Steam VR Knuckles and desktop (PC/MacOsX) compatibility! Controllers: Oculus Rift with Touch controllers HTC Vive with trackers Steam VR Knuckles controllers Mouse/trackpad You only need to use one hand to control all animations and poses! Explain to me more! This is obviously adult-only and the virtual reality should be used wisely. But be sure to be amazed by how realistic the experience is! We are constantly adding features like animations and different girls and places for the simulation, also some body interactions, like moving the hair and the breasts using your VR controllers. It is already there! And it is really cool! To begin a real life inside VR, would be nice to have a Real Girl in your VR, right? Stay with us on this journey to the most realistic virtual sex experience. * REAL GIRL VR IS A FULLY INTERACTABLE GAME. ** REAL GIRL VR IS NOT A VIDEO OR A SIMPLE 'TOUR' ON THE SCENARIO. *** YOU DO NOT NEED TO USE A VR HEADSET. WORKS PERFECTLY WITH MOUSE. **** WITH VR HEADSET IS REALLY AWESOME!

[心境 VR / Mind VR Exploration](#)

(0 - 20000 estimated owners) - (Casual, Education, Immersive Sim, Life Sim, Exploration, Adventure, Visual Novel, Clicker, Crafting, VR, Experimental, Indie, Simulation, 6DOF, Singleplayer)

The Mind VR Exploration was selected in the 78th VENICE FILM FESTIVAL VR EXPANDED - Best Of VR. What's the Mind VR Exploration? This is an unprecedented exploratory learning VR application. The most cutting-edge VR digital technologies are adopted to bring an immersive experience with various elements, such as, Chinese classical architectures, implements, poems, and extraordinary imagination, to users, very impressive. It is also the first time that Chinese ancient poems and Chinese classical gardens are integrated into one scene, and the unknown are revealed one by one in the form of answering questions, enabling users to set free their imaginations, and allowing them to perceive and savor the profound Chinese classical culture. Users may feel as if they are in their dreams. After rigorous textual research, the 'Xiaoxiang Pavilion' described in 'A Dream of Red Mansions' is restored in a panoramic view, recreating classical gardens, furniture and daily scenes in the Ming Dynasty. You can pick up everything you like and play with it. You might even fabricate a Chinese 'paper kite', hand-write a pair of Chinese characters, and listen to the Chinese zither played by the ancients on the waterfront. It is like you travel through time and space, and witness the ancients' elegance and panache. Finally, you walk in the wind, appreciate the transcendent Chinese natural scenery, and arrive at the next node of exploration. Compared with the traditional VR applications in the past, Mind brings a higher level of immersive experience to users. Unparalleled impression will be engraved in the memory of users. For elementary and middle school

students, it is a suitable education media, users (students) will be amazed by this peculiar learning method.

[7D Game \(VR for VIVE\)](#)

(20000 - 50000 estimated owners) - (Free to Play, Indie, Simulation, VR)

Essentially it will be a social game based on players' own creation, where players can make their own game rules in their own created WORLDS and share the WORLDS to everyone else to play or clear through social networking services. You can see it as a VR version Minecraft or Besiege, but more than them.

[Podium Bash](#)

(0 - 20000 estimated owners) - (Indie, Casual, Early Access, VR, VR Only)

Podium Bash is an extremely fun local multiplayer VR game! In the standard gamemode one player in VR stands atop a podium armed with a bat and shield tasked with staying on top for as long as they can. Up to four players using controllers are tasked with knocking the VR player off the podium by shooting cannons at the VR player. In the Standard Reverse gamemode the VR player is stood on top of a podium with a mounted turret and has 90 seconds to destroy all of the carts targets. There can be between 1 and 4 carts controlled by either human players or AI; The carts have to move around and avoid having there targets destroyed by the VR player. If they can last 90 seconds without all there targets being destroy they win, if not the VR player wins! In the Cannon Practice gamemode between one and four players take control of cannons and have to get as many points as they can in 90 seconds. To get points you have to shoots and successfully hit targets with targets further away being worth more points. This gamemode is not intended to be played with a VR player as it is design to help cannon players hone their skills. In the Bat Practice gamemode there is only the VR player and a single AI cannon that auto fires balls at them. The VR player uses there bat to hit the ball back into targets around the level to score as many points as they can in 90 seconds. This gamemode is not intended to be played with non VR players as it is designed to help the VR player hone their batting skills. Customisation 9 unique bats, including base ball batt, hocky stick, and cactus! 9 unique shields, including knight sheild, trojan shield, and floppy disk! 5 unique cannon skins with custom cannon balls, such as a wheeley bin that fires bags of rubbish! Gamemodes Standard Standard Reverse Cannon Practice Bat Practice MORE COMING SOON

Dynamic connections, vivid images and wonderful stories of all the 88 constellations 6000 stars which are based on real data, you will learn a lot about the universe, constellation etc

[VectorBall](#)

(0 - 20000 estimated owners) - (PvP,Competitive,e-sports,VR,Surreal,Team-Based,Action,Colorful,Psychedelic,Atmospheric,Hacking,Physics,Multiplayer,Singleplayer,Early Access,Electronic Music,Indie,Sports,VR Only)

~~ARTIFICIAL INTELLIGENCE ERROR~~ VectorBall is a multiplayer dodgeball inspired game. Set in a vibrant Virtual Cyberspace, charge and throw balls at other players to kill them and score. Join our Discord server here if you'd like to share feedback and give suggestions! Check out our soundtrack on SoundCloud! -ball/tracks
Gameplay Breakdown With either your right and left hand, you can pull the trigger to charge an Energy Ball. After a quick charging period, the ball is ready to throw. The ball responds to your actions in a realistic and very natural manner. At any point, you have two types of balls available to you, a Damage and Teleport ball. The Damage Ball will kill any enemy player it touches. If you charge it and hold it in your hand, you can also use it to deflect incoming balls. The Teleport Ball is your primary method of

locomotion. It has a short charge time, and will teleport you to wherever it lands immediately. Think before you throw however, the ball won't teleport you until it lands. If you're in a tricky spot with enemies and try to throw the ball very far, you have to wait for the ball to travel before you teleport. Sometimes it may be smarter to throw the ball closer to you to teleport faster. Watch enemies actions with their balls as a strategy, if they've just teleported, you have a chance to strike as they have to charge it before teleporting again. If you have a Damage Ball coming towards you and can't teleport in time, you can either physically move in your play space to dodge the ball, or if you have a charged Damage Ball in your hand you can block with it. Experiment with the balls and come up with strategies to gain an advantage against your multiplayer opponents. Features Currently there are 3 vastly different multiplayer maps in the game. A Vaporwave Arena, a Vibrant city where battle it out on rooftops, and a Desert military base with some otherworldly intruders. We have plans to add many more levels in the coming months, and want to share our development process with the community. Practice your skills offline in a round based VR Training mode. Right now we have Deathmatch and Team Deathmatch game modes, with the options of 1v1, 2v2, and 4v4 players. We are working to add an Objective based game mode, that involves hoops on both teams side of the arena. With 1 life per player per round, players will score by taking the Score ball and throwing it in the enemies hoop, all while avoiding getting killed. Dev Notes We are working hard add more features and polish the game further. Join our Discord server if you'd like to give us feedback or ask any questions! We'd love to hear your ideas. We want to make a fun, physics based multiplayer game that takes full advantage of what makes VR unique. We hope you enjoy what we've created so far, we look forward to showing you what else is to come .

[Quiz Night Tonight!](#)

(0 - 20000 estimated owners) - (Indie,Casual,Racing,VR,Board Game,Local Co-Op,Trivia,4 Player Local)

Play with or without VR. Step into an online GameShow! Trivia has never been so much fun. Featuring thousands questions, on a variety of genres/topics. Experience Trivia like never before. Game Modes: Trivia : This your standard trivia, where players will attempt to answer questions as fast as they can. Each player gets 10 seconds to answer, the quicker they answer the more points they earn for each correct answer. This mode also features mini game events after x amount of questions. The mini games are Ball Room, and a Jigsaw puzzler. Ball Room, will have you competing to hit as many targets as possible within the time limit. Jigsaw puzzler will require you to complete the puzzles as fast as possible. Knowledge Race: This game mode is based off of board game like mechanics. Players will race towards a finish line, only advancing forward by answering correct trivia questions. But watch out for traps! Online: Trivia is 1-6 players, Knowledge Race is 1-4. Local Co op: 1-4 players.

[Eye in the Sky](#)

(0 - 20000 estimated owners) - (Casual,Indie,Strategy,Local Co-Op,Co-op Campaign,VR,Puzzle-Platformer,Asymmetric VR)

This game requires a VR Headset and a second human (both not included). Only features local co-op. Eye in the Sky is a large asymmetrical local co-op escape room for VR. Take up this challenge of perspectives and communication with a friend (or enemy, we won't judge). Traverse a post-apocalyptic robot world from two different view points and help each other solve the puzzles that lay ahead. The VR Player takes on the form of the 'Eye'. Interacting with objects in the world from a birds eye view and guiding the 'Light'

to help find pieces to the puzzles they have to solve. The PC Player will be the 'Light'. A small robot, seemingly insignificant but essential for the 'Eye'. Venturing into the nooks and crannies of the world where the 'Eye' can't reach, the 'Light' can gather information, guide the 'Eye' to hidden areas and collect vital parts of each and every puzzle. Key features - Taking full use of VR roomscale feature - All levels are built to fit in a 2m x 2m area (If you can't reach something it's probably the PC players task to get there!) - Two ways to experience and play the game, PC or VR! - A large escape room experience that builds on its complexity the further you and your friends venture into it.

[VReakout](#)

(0 - 20000 estimated owners) - (Action,Casual,Indie,VR)

VReakout is a modern re-imagining of the classic brick breaker genre with a virtual reality twist and designed for the HTC Vive VR System. 'It's a whole new ball game.' Your mission is in deep space where you clear the areas before getting sucked into the Black Hole. Don't look back. Break through the levels within the time limit. How many balls will it take you? Work around the ice cube barriers! Perfect your timing to defeat the pulsating cubes. Bonus points for speed! VReakout's Full Release features a huge amount of crazy awesome levels and environments, challenges, power-ups, puzzles, spacescapes, music, accelerators, crazy memes, bombs and so much more combined with an action packed frenetic pace and music that's on point. This game is one to add to your Vive exercise routine.

[Marlene Betwixt](#)

(0 - 20000 estimated owners) - (Casual,Adventure,Indie,Action,VR,Horror,Psychological Horror,Simulation,Puzzle,Detective,Mystery,Crime,Exploration,First-Person,Psychological,Drama,Demons,Supernatural,Story Rich,Controller)

The BETWIXT UPDATE released on the 6th of December adds graphical enhancements, more gameplay and more surprises! Marlene is a tense and immersive psychological horror story in which you star as the protagonist Ewan Brody. Ewan is on his way to visit his estranged sister at her remote cottage after hearing the news that his Niece Marlene has gone missing or possibly something worse! As you uncover the mystery by completing environmental tasks and puzzle solving you are relentlessly pursued by a mysterious figure who's motives are unclear. Enter an interactive horror story that immerses the player in it's supernatural setting and piece together what has been happening around the estranged family. Now playable without a VR headset. Joypad or mouse/keyboard supported. Built for VR as a room scale experience for the HTC Vive & Oculus Touch Environmental tasks, puzzle solving and object manipulation Psychological horror visual and audio elements * Headphones are advised for the best audio experience * Marlene is an indie game produced & developed solely by one individual with a goal to bring an 80's horror movie vibe to VR and PC gamers.

Made with Streamlit
